Development Parameters & Goals

“A Continuation of Effort”

“Core Area”
Development Parameters

**Applicability**
- Priorities are identified to address the needs for the community and site.
- Development scale and density will be driven by market demand.
- Development parameters are provided to help Township officials, developers, property/business owners attain consensus on development character.
- Adherence to the development parameters will help shape the appropriate character for each area.
- The development parameters should act as a guide for Township officials during the site plan review process.
- Design and development guidelines should be developed as part of any final development plan.
- Adopt New Urbanism, Smart Growth, Complete Streets and LEED sustainable principles appropriate to the priority areas.
- Any existing use shall be permitted to continue and the use shall be subject to underlying regulatory framework.
- Any change in use without affecting the exterior modifications will be permitted subject to underlying regulatory framework.
- Any expansion or new developments affecting any exterior modifications shall abide by applicable design and development guidelines based on these development parameters. Such modifications and development would be subject to detailed site plan review process by Township officials.

**Purpose**
- Encourage mixed-use, pedestrian-friendly environment
- Promote complementary uses and neighborhood-based commercial opportunities
- Encourage shared parking behind buildings in commercial areas
- Minimize traffic congestion, inefficient surface parking lots, curb cuts to reduce infrastructure costs
- Integrate public plazas and gathering places to promote sense of place
- Provide a range of housing choices
- Regulate building height, massing, density and building lines to achieve appropriate transition and scale from commercial to residential and natural areas
- Adopt interconnected road network to ease traffic
- Promote walkable neighborhoods with sidewalk and trail connectivity
- Connect with the potential “cultural trail” consisting of Township landmarks, institutions, parks and recreational spaces
- Preserve environmentally sensitive areas such as steep slopes, floodplain, tree cover areas
- Promote sustainable design standards:
  - Reduce the energy use required for lighting, heating, and cooling of structures.
  - Reduce the energy use required for transportation
  - Encourage design that promotes non-motorized transportation alternatives like walking and biking.
  - Reduce on-site water usage.
  - Reduce the off-site runoff of stormwater.
  - Protect existing vegetation and habitat.
  - Promote higher density infill development where the infrastructure capacity exists.

**Priority Areas**

**High Priority**
- Gateway Mixed-Use Development
- B. Higher Density Neighborhood with Community Center

**Medium Priority**
- C. Corridor Mixed-Use Development

**Long-Term Priority**
- D. Neighborhood Enhancement and Street Connectivity
- E. Estate Homes
